Author Guidelines

Copyright Statement:

- Copyright on any research article is transferred in full to International Journal of Environment upon publication. The copyright transfer includes the right to reproduce and distribute the article in any form of reproduction (printing, electronic media or any other form).
- Articles in the International Journal of Environment are Open Access articles published under the Creative Commons CC BY-NC License (<https://creativecommons.org/licenses/by-nc/4.0/>)
- This license permits use, distribution and reproduction in any medium, provided the original work is properly cited and is not used for commercial purposes.

Guidelines

1. An author's major commitment is to present a concise, accurate account of the research performed as well as an objective discussion of its significance.
2. A paper should contain sufficient detail and references to public sources of information to permit the author's peers to repeat the work.
3. An author should cite those publications that have been significant in determining the nature of the reported work and that will guide the reader quickly to the earlier work that is essential for understanding the present investigation.

Information

- [For Readers](#)
- [For Authors](#)

4. Information obtained privately, as in conversation, correspondence, or discussion with third parties, should not be used or reported in the author's work without explicit permission from the investigator with whom the information is originated.
5. Fragmentation of research papers should be avoided. A scientist who has done extensive work on a system or group of related systems should organize publication so that each paper gives a complete sense of the general study.
6. It is unethical for an author to publish manuscripts describing essentially the same research in more than one journal of primary publication.
7. Submitting the same manuscript to more than one journal concurrently is unethical and unacceptable.
8. After receipt of research paper, your paper will be sent to two reviewers, and both reviewers should approve the paper. Their decision regarding acceptance will be final and binding. The editorial board reserves the right to condense or make changes to the research article. When revision of a manuscript is requested, authors should return the revised version of their manuscript as soon as possible.
9. Authors will receive a PDF file with the edited version of their manuscript for final proofreading/galley proof. This is the last opportunity to view an article before its publication on the journal web site. The galley proof must be confirmed within three (3) days. No changes or modifications can be introduced once it is published. Manuscripts accepted for publication are published on-line. After publication, the corresponding author is notified by email and receives a PDF file with the published version of the manuscript. A properly completed copyright form must be provided for each accepted manuscript and should be duly signed, scanned and sent via email to the managing editor. Delay in sending the form will automatically delay the publication of the paper.
10. An author should make no changes to a paper after it has gone through the galley proof. If there is a compelling reason to make changes, the author is obligated to inform the editor directly of the nature of the desired change. Only the editor has the final authority to approve any such requested changes. The Galley Proof (GP) of the papers are the final ones which will be made to the public.
11. A criticism of a published paper may be justified; however, in no case is personal criticism considered acceptable.
12. Only persons who have significantly contributed to the research should be listed as authors. The corresponding author attests that any others named as authors have seen the final version of the paper and have agreed to its submission for publication. The author who submits a manuscript for publication accepts the responsibility of having included as co-authors all persons appropriate and none inappropriate.

The International Journal of Environment (IJE) welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence.

Electronic submission of manuscripts is strongly encouraged, provided that the text, tables, and figures are included in a single Microsoft Word file (preferably in Times New Roman font).

Submit manuscripts as e-mail attachments to the editorial office at: nepal.psd@gmail.com. A manuscript number will be mailed to the corresponding author on the same day or within 48 hours.

The cover letter should include the research title, author's full address and telephone/fax numbers and should be in an e-mail message sent to the Chief Editor, with the file, labelled with the first author's surname, as an attachment.

All matter and information should be submitted by email. Soft copy format should be in MS word only. Charts, tables and diagrams should be in MS Word and images in JPEG format with the good resolution. However, the total size of the file should not exceed 1 MB. All matter should be typed in Times New Roman Font 12 point.

Spelling: Either British or American but not mixed.

Units: S.I. Use negative indices rather than / and leave spaces between symbols, e.g. m s^{-1} not ms^{-1} or m/s .

Symbols: Define in text

Math: Type if possible

Full-length research papers (maximum 12 A4 pages) should be divided as follows:

Title, Authors' names with institutional address and email, Abstract, Keywords, Introduction, Material and Methods, Results, Discussion, Conclusion, Acknowledgements, References, Tables and Figures.

Titles should be informative. Avoid formulas in titles. They should include specific location if possible.

Abstract: 600 words maximum. Include main points of the paper.

Keywords: Only five

Introduction: Should provide a clear statement of the problem, the relevant literature on the subject, and the proposed approach or solution. It should be understandable to colleagues from a broad range of scientific disciplines.

Materials and methods: Should be complete enough to allow experiments to be reproduced and should include the study area.

Results: Should be presented with clarity and precision. Should be written in the past tense when describing findings in the authors' experiments. Previously published findings should be written in the present tense. Results should be explained, but without referring to the literature. Discussion, speculation and detailed interpretation of data should not be included in the results but should be in the discussion section.

Discussion: Should interpret the findings in view of the results obtained in this and past studies on the topic. State the conclusions in a few sentences at the end of the paper. The results and discussion sections can include subheadings. When appropriate, the two sections can be combined.

Acknowledgements: Acknowledgements of people, grants, funds, etc. should be brief.

Tables: Should be kept to a minimum and be designed to be as simple as possible. Tables should be prepared in Microsoft Word. Tables are to be typed double-spaced throughout, including headings and footnotes. Each table should be on a separate page, numbered consecutively with Arabic numerals and supplied with a title and footnotes. Tables should be self-explanatory without reference to the text. The details of the methods used in the experiments should be described in the footnotes. The same data should not be presented in both a table and a graph or repeated in the text.

Figure legends: Should be typed in numerical order on a separate page. Use Arabic numerals to designate figure numbers and upper-case letters for their parts (Figure 1A). Begin each legend with a title and include sufficient description so that the figure is understandable without reference to the text of the manuscript. Graphics should be prepared with applications capable of generating high-resolution JPEG before pasting into the Microsoft Word manuscript file.

References

References should appear in the text as: Sharma (2013) or (Sharma, 2013) according to content of sentence. For three or more authors use the first author's name followed by "et al."

References should be listed in alphabetical order of first author's surname at the end of text as follows:

Author's name(s), initials, year of publication, title. Periodical titles should be written out in full, with volume number and inclusive page numbers.

Bhandari, G., 2012. Study on agricultural production in Nepal: a case study in far western development region. *International Journal of Engineering and Sciences*, 12(6), 60-70.

Bhandari, G. and Panthi, B.B., 2014. Analysis of Agricultural Drought and its Effects on Productivity at Different District of Nepal. *Journal of Institute of Science and Technology*, 19(1): 106-110.

K.C., A., Bhandari, G., Wagle, S.P. and Banjade, Y., 2013. Status of soil fertility in a community forest of Nepal. *International Journal of Environment*, 1(1), 56-67.

Book references should include the title, publisher's name, location and page numbers.

Conference, symposium and workshop proceedings should include sufficient information for the reader to locate the reference. In particular, references should contain the name and address of the organization responsible.

Authors and co-authors may be members of Progressive Sustainable Developers and develop the journal in their home country.

Submission Preparation Checklist

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

1. The submission has not been previously published, nor is it before another journal for consideration (or an explanation has been provided in Comments to the Editor).
2. The submission file is in OpenOffice, Microsoft Word, RTF, or WordPerfect document file format.

3. Where available, URLs for the references have been provided.
 4. The text is single-spaced; uses a 12-point font; employs italics, rather than underlining (except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
 5. The text adheres to the stylistic and bibliographic requirements outlined in the [Author Guidelines](#), which is found in About the Journal.
 6. If submitting to a peer-reviewed section of the journal, the instructions in [Ensuring a Blind Review](#) have been followed.
-

Copyright Notice

The author(s) acknowledge that the manuscript submitted is his/her/their own original work; all authors participated in the work in a substantive way and are prepared to take public responsibility for the work; all authors have seen and approved the manuscript as submitted; the manuscript has not been published and is not being submitted or considered for publication elsewhere; the text, illustrations, and any other materials included in the manuscript do not infringe(plagiarism) upon any existing copyright or other rights of anyone.

Notwithstanding the above, the Contributor(s) or, if applicable the Contributor's Employer, retain(s) all proprietary rights other than copyright, such as Patent rights; to use, free of charge, all parts of this article for the author's future works in books, lectures, classroom teaching or oral presentations; the right to reproduce the article for their own purposes provided the copies are not offered for sale.

The copyright to the contribution identified is transferred to IJE.

(c) International Journal of Environment. Articles in the International Journal of Environment are Open Access articles published under the Creative Commons CC BY-NC License (<https://creativecommons.org/licenses/by-nc/4.0/>). Privacy Statement

Nepal Journals Online (NepJOL) is a member of the Ubiquity Partner Network coordinated by Ubiquity Press. According to the EU definitions, NepJOL is the data controller, and Ubiquity Press are the service providers and data processors. Ubiquity Press provide the technical platform and some publishing services to NepJOL and operate under the principle of data minimisation where only the minimal amount of personal data that is required to carry out a task is obtained.

More information on the type of data that is required can be found in Ubiquity Press' privacy policy below.

Ubiquity Press Privacy Policy

We take seriously our duty to process your personal data in a fair and transparent way. We collect and manage user data according to the following Privacy Policy. This document is part of our [Terms of Service](#), and by using the press portal, affiliated journals, book, conference and repository websites (the "Websites"), you agree to the terms of this

Privacy Policy and the Terms of Service. Please read the [Terms of Service](#) in their entirety, and refer to those for definitions and contacts.

What type of personal data do we handle?

There are four main categories of personal data stored by our journal platform, our press platform, and our book management system; Website User data, Author data, Reviewer data and Editor data.

The minimum personal data that are stored are:

- full name
- email address
- affiliation (department, and institution)
- country of residence

Optionally, the user can provide:

- salutation
- gender
- associated URL
- phone number
- fax number
- reviewing interests
- mailing address
- ORCID
- a short biography
- interests
- Twitter profile
- LinkedIn profile
- ImpactStory profile
- profile picture

The data subjects have complete control of this data through their profile, and can request for it to be removed by contacting info@ubiquitypress.com

What do we do to keep that data secure?

We regularly backup our databases, and we use reliable cloud service providers (Amazon, Google Cloud, Linode) to ensure they are kept securely. Backups are regularly rotated and the old data is permanently deleted. We have a clear internal data handling policy, restricting access to the data and backups to key employees only. In case of a data breach, we will report the breach to the affected users, and to the press/journal contacts within 72 hours.

How do we use the data?

Personal information is only used to deliver the services provided by the publisher. Personal data is not shared externally except for author names, affiliations, emails, and links to ORCID and social media accounts (if provided) in published articles and books which are displayed as part of the article/book and shared externally to indexes and databases. If a journal operates under open peer review then the reviewer details are published alongside the reviewer details.

How we collect and use your data:

1. When using the website

1.1 what data we collect

- When you browse our website, we collect anonymised data about your use of the website; for example, we collect information about which pages you view, which files you download, what browser you are using, and when you were using the site.
- When you comment on an article or book using Disqus, we are not collecting, controlling or processing the data. More details on the DISQUS privacy policy can be found on their [website](#).
- When you annotate an article or book, this is done via a 3rd party plugin to the website called Hypothes.is. In using this plugin we are not collecting, controlling or processing the data. More details on the Hypothes.is privacy policy can be found on their [website](#).

1.2 why we collect the data

- We use anonymised website usage data to monitor traffic, help fix bugs, and see overall patterns that inform future redesigns of the website, and provide reports on how frequently the publications on our site have been accessed from within their IP ranges.

1.3 what we do (and don't do) with the data

- We do not collect personal information that can be used to identify you when you browse the website.
- We currently use Google Analytics for publication reports, and to improve the website and services through traffic analysis, but no personal identifying data is shared with Google (for example your computer's IP is anonymised before transmission).

1.4 what to do if you want to get a copy of your data, or want your data to be removed

- Please contact info@ubiquitypress.com to request a copy of your data, or for your data to be removed/anonymised.

2. When registering as an author, and submitting an article or book

2.1 what data we collect

- When registering an account we ask you to log in and provide certain personal information (such as your name and email address), and there is the option to register using an ORCID which will pre-fill the registration form.
- As part of submitting an article for publication, you will need to provide personally identifying information which will be used for the peer review process, and will be published. This can include 'Affiliation', 'Competing interests', 'Acknowledgements'.

2.2 why we collect the data

- Registering an account allows you to log in, manage your profile, and participate as an author/reviewer/editor. We use cookies and session information to streamline your use of the website (for example in order for you to remain logged-in when you return to a journal). You can block or delete cookies and still be able to use the websites, although if you do you will then need to enter your username and password to login. In order to take advantage of certain features of the websites, you may also choose to provide us with other personal information, such as your ORCID, but your decision to utilize these features and provide such data will always be voluntary.
- Personal data submitted with the article or book is collected to allow follow good publication ethics during the review process, and will form part of the official published record in order for the

provenance of the work to be established, and for the work to be correctly attributed.

2.3 what we do (and don't do) with the data

- We do not share your personal information with third parties, other than as part of providing the publishing service.
- As a registered author in the system you may be contacted by the journal editor to submit another article.
- Any books published on the platform are freely available to download from the publisher website in PDF, EPUB and MOBI formats on the publisher's site.
- Any personal data accompanying an article or a book (that will have been added by the submitting author) is published alongside it. The published data includes the names, affiliations and email addresses of all authors.
- Any articles published on the platform are freely available to download from the publisher website in various formats (e.g. PDF, XML).
- Ubiquity Press books and articles are typeset by SiliconChips and Diacritech. This process involves them receiving the book and book associated metadata and contacting the authors to finalise the layout. Ubiquity Press work with these suppliers to ensure that personal data is only used for the purposes of typesetting and proofing.
- For physical purchases of books on the platform Ubiquity Press use print on demand services via Lightning Source who are responsible for printing and distribution via retailers. (For example; Amazon, Book Repository, Waterstones). Lightning Source's privacy policy and details on data handling can be found on their [website](#).

2.4 why we store the data

- We store the account data so that you may choose to become a reviewer and be able to perform those tasks, or to become an author and submit an article and then track progress of that article.
- Published personal data that accompanies an article or a book forms part of the official published record in order for the provenance of the work to be established, and for the work to be correctly attributed.

2.5 what to do if you want to get a copy of your data, or want your data to be removed

- You are able to view, change and remove your data associated with your profile. Should you choose to completely delete your account, please contact us at support@ubiquitypress.com and we will follow up with your request as soon as possible.
- To conform to publication ethics and best practice any personal data that is published alongside an article or book cannot be removed. If you have a query about a publication to which you are attributed please contact info@ubiquitypress.com

3. When registering as a reviewer

3.1 what data we collect

- To become a reviewer you must first register as a user on the website, and set your preference that you would like to be considered as a reviewer. No new personal data is collected when a registered user elects to become a reviewer.
- When registering an account we ask you to log in and provide certain personal information (such as your name and email

address), and there is the option to register using an ORCID which will pre-fill the registration form.

- Reviewers can also be registered by editors who invite them to review a specific article. This requires the editor to provide the reviewer's First Name, Last Name, and Email address. Normally this will be done as part of the process of inviting you to review the article or book.
- On submitting a review, the reviewer includes a competing interest statement, they may answer questions about the quality of the article, and they will submit their recommendation.

3.2 why we collect the data

- The data entered is used to invite the reviewer to peer review the article or book, and to contact the reviewer during and the review process.
- If you submit a review then the details of your review, including your recommendation, your responses to any review form, your free-form responses, your competing interests statement, and any cover letter are recorded.

3.3 what we do (and don't do) with the data

- This data is not shared publicly and is only accessible by the Editor and system administrators of that journal or press.
- The data will only be used in connection with that journal or press.
- Data that is retained post final decision is kept to conform to publication ethics and best practice, to provide evidence of peer review, and to resolve any disputes relating to the peer review of the article or book.
- For journals or presses that publish the peer reviews, you will be asked to give consent to your review being published, and a subset of the data you have submitted will become part of the published record.

3.4 what to do if you want to get a copy of your data, or want your data to be removed

- If you would no longer like to be registered as a reviewer you can edit your profile and tick the box 'stop being a reviewer'. This will remove you from the reviewer database, however any existing reviews you may have carried out will remain.
- If you have been contacted by an editor to peer review an article this means that you have been registered in the system. If you would not like to be contacted for peer review you can reply to the email requesting that your data be deleted.

4. When being registered as a co-author

4.1 what data we collect

- Co-author data is entered by the submitting author. The submitting author will already have a user account. According to standard publishing practice, the submitting author is responsible for obtaining the consent of their co-authors to be included (including having their personal data included) in the article/book being submitted to the journal/press.
- The requested personal data for co-authors are at the bare minimum; first name, last name, institution, country, email address. This can also include; ORCID ID, Title, Middle Name, Biographical Statement, Department, Twitter Handle, LinkedIn Profile Name or ImpactStory ID.

4.2 why we collect the data

- Assuming that it is accepted for publication, this data forms part of the official published record in order for the provenance of the work to be established, and for the work to be correctly attributed.
- Author names, affiliations and emails are required for publication and will become part of the permanent cited record.

4.3 what we do (and don't do) with the data

- The co-author's personal data is stored in the author database. This personal data is only used in relation to the publication of the associated article.
- Any co-author data collected is added to the author database and is only used in association with the article the user is co-author on.

4.5 what to do if you want to get a copy of your data, or want your data to be removed

- To receive a copy of your data, please contact info@ubiquitypress.com
- To conform to publication ethics and best practice any personal data that is published alongside an article or book cannot be removed. If you have a query about a publication to which you are attributed please contact info@ubiquitypress.com

5. When signing-up to receive newsletters

5.1 what data we collect

- We require you to include your name and email address

5.2 why we collect and store the data, and for how long

- This data would be collected to keep you updated with any news about the platform or specific journal

5.3 what we do (and don't do) with the data

- We use mailchimp to provide our mailing list services. Their privacy policy can be found [here](#)

5.4 what to do if you want to get a copy of your data or want your data to be removed

- All emails sent via our newsletter client will include a link that will allow you to unsubscribe from the mailing list

Notification about change of ownership or of control of data

We may choose to buy or sell assets. In the case that control of data changes to or from Ubiquity Press and a third party, or in the case of change of ownership of Ubiquity Press or of part of the business where the control of personal data is transferred, we will do our best to inform all affected users and present the options.

(Updated: 18 May 2018)
